

Smart Connected Cities

Autonomy Hub with its extensive partnerships and relationships is actively involved in Smart City initiatives throughout the United States. With its most valued partner, Tesla Foundation, the Autonomy Hub is focused on:

1. **Smart City Strategic Plan Development** – work with institutions, business and government to create a cohesive, unified plan and implementation strategy for a city’s adoption of connected and autonomous vehicles and infrastructure systems.
2. **Industry Cluster Development** – build business, education, stakeholder, and public organization network. We will convene an advisory council of businesses, technology, educators, and stakeholders to ensure adoption of new technologies and policies that are integrated with an entire community.
3. **Workforce development and Education** in industries directly related to Smart City Technologies.
4. **National Industry Business Partners and Vendor Attraction** – build relationships and attract industry partners.

Services Include:

- Strategic Planning
- Project Coordination
- Workforce Development
- Academic Collaborator
- Industry Cluster/Economic Development
- Physical Site for Research, Testing, and Implementation of New Technologies.
